**Alberta's International Merchandise Exports**  
**January – June 2007**  
**Highlights**

**Overview:** In the first half of 2007, the value of Alberta's international merchandise exports grew by 9.0% from the same period of last year, to \$44.4 billion. This increase was largely the result of higher exports of crude oil, primary and fabricated metals, crops and machinery. The weak U.S. housing market caused exports of wood products to contract sharply. Export volumes rose an estimated 8.0% in the first half, because of strong gains for energy products, such as crude oil and coal, and manufactured goods, such as oil and gas field machinery and fabricated metals.

**Major Commodities:** Higher prices and volumes fuelled exports of nickel, wheat, ethylene glycol, styrene, canola oil, and oil pipeline in the first six months. Price increases led to gains for canola, cobalt and wood pulp. Crude oil, gas, urea, and coal advanced on higher volumes. Lower prices and volumes caused declines in shipments of oriented strand board, lumber and acyclic hydrocarbons. Lower prices resulted in lower ethylene polymer and polyethylene deliveries, and lower volumes reduced exports of propane and sulphur.

**Exports by Industry:** Mining and Energy exports were up 7.8% because of higher crude oil and natural gas volumes. Primary Agricultural exports climbed by 26.2% because of a 35.9% jump in crop shipments. Manufacturing exports rose 10.3% because of volume and price gains. Large export gains were noted for these manufacturing sectors: Primary and Fabricated Metal Products; Machinery; and Food, Feed and Beverages.

**North America:** U.S. imports of Alberta merchandise grew by 6.8%, primarily as a result of strong growth for crude oil, pipe for oil pipeline, and oil and gas field machinery. Large increases were also noted for wood

pulp, styrene and wheat. Mexican imports increased by 22.4% due to higher wheat, canola and fresh boneless beef deliveries.

**Asia:** Exports to Asia jumped 29.4% due to large increases for nickel, wheat, canola and canola oil. Exports to China were sharply higher by 43.9% because of higher shipments of nickel, ethylene glycol and canola oil. Japan's imports of Alberta goods grew by 21.0% due to increased hay, canola and cobalt deliveries. Shipments to the Philippines more than quadrupled because of higher wheat exports.

**Europe:** European imports increased strongly by 58.3% because of a tripling of nickel imports. Large increases were also registered for truck trailers and cobalt deliveries. Exports to Belgium, the Netherlands, Italy and Spain more than doubled.

**Middle East and North Africa:** Exports to the Middle East and North Africa fell 0.6% in large part due to a drop in canola sales to the United Arab Emirates. Wheat and drilling equipment and parts remained the top exports to the region.

**Other Regions:** South American imports rose 4.0% because of higher shipments of wheat and oil and gas field machinery and equipment to the area. Central American imports dropped by 21.5% as a result of a sharp decrease in diesel and fuel oil sales to Guatemala. Exports to the Commonwealth of Independent States rose 29.9% because of a surge in oil and gas field machinery and equipment, such as pumps. The same commodities fuelled a 5.2% increase in imports by the Oceania region. Sub-Saharan Africa's imports climbed sharply by 58.0% because of increased shipments of wheat to the Sudan and South Africa.

\* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.
